APHASIA

sentences that have no meaning,

Individuals with **receptive** aphasia may speak in long sentences that have no meaning, add unnecessary words, and even create new "words" (neologisms). For example, someone with receptive aphasia may say, "You know that smoodle pinkered and that I want to get him round and take care of him like you want before" meaning "The dog needs to go out so I will take him for a walk". They have poor auditory and reading
